L!SA Regression Tests

Login

TC - 1

Pre-conditions: You will need a registered L!SA user.

TC 1.1 - Successful Login	Expected Results	
Given I login to the NDTP app with valid credentials **When** I click the L!SA application **Then** I see the L!SA Home page view	Upon login, the user is taken to the **Home page**. The user can view: • Tasks assigned to them • Their notifications	 L!SA Home page

TC 1.2 - Successful Logout	Expected Results	
Given I login to the NDTP app with valid credentials **And** I click the L!SA application **And** I click the profile menu **When** I click sign out **Then** I am logged out	The user can log out via the **Profile menu** options. After a successful sign out, the user is returned to the **NDT login page**.	 Profile menu Login page

Notifications

TC - 2

TC 2.1 - View Notifications	Expected Results	

Given I am logged into L!SA **When** I click the Notifications bell icon **Then** I see the Notifications page **And** I can toggle between 'All' and 'Unread'	The user can navigate to the **Notifications page**. The Notifications page displays the following tabs: • **All** • **Unread** Each notification displays: • Notification name • Creator of the notification • Time of the notification • The incident it relates to Unread notifications: • Are displayed in **bold** • Display an **unread badge**	 Notifications - All  Notifications - Unread

TC 2.2 - Click on notification	Expected Results	
Given I am viewing the notifications page **When** I select a notification **Then** I should be navigated to the related task or incident log entry	When a user selects a notification, they are taken to the **related page**, such as the associated **task** or **incident log entry**.	 Related task

Profile

TC - 3

User guide is being updated.

TC 3.1 - User guide	Expected Results	

Given I click the profile menu **When** I click user guide **Then** I can download the user guide	The user is presented with the option to **Download** the user guide or **Cancel**. If the user selects **Download**, the user guide is downloaded in **PDF format** and can be opened by the user.	 Profile menu Download  Downloaded PDF

Settings page is different for Admin & General user

TC 3.2 - Settings	Expected Results	
Given I click the profile menu **When** I click settings **Then** I am taken to the settings page	The user is able to navigate to the **Settings page**.	 Profile menu  Settings page (Admin)

		 Settings page (General user)

TC 3.3 - View my profile	Expected Results	
Given I have clicked the profile menu **And** clicked on settings **When** I click manage my profile **Then** I am taken to my profile	The user is able to navigate to **their profile**.	 Settings page (Admin)  Settings page (General user) Profile

Pre-conditions: You will need to be logged in as an Admin user.

TC 3.4 - Manage users	Expected Results	

Given I am logged in as an Admin user
And I have clicked the profile menu
And I have clicked Settings
When I click manage users
Then I am taken to a list of all users
	The **Admin user** can navigate to the **Manage Users** page and see:
	• A list of all users
	• **Add New User** button *(coming soon)*
	• **Sort & Filter**
	  ◦ Sort by
	  ▪ Name (A-Z) - *Default*
	  ▪ Name (Z-A)
	  ▪ Organisation (A-Z)
	  ▪ Organisation (Z-A)
	  ◦ Search
				Settings page (Admin)
		 		Manage users page

TC 3.5 - View another users profile	Expected Results	
Given I am logged in as an admin user **And** I have clicked the profile menu **And** I have clicked on settings **And** have I clicked manage users **When** I click on another users name **Then** I am taken to their profile	The **Admin User** can navigate to the **Profile** page of any listed user and see: • Organisation • Email address	 Settings page (Admin)  Manage users page

		 Other users profile

TC 3.6 - Manage incidents	Expected Results	

Given I am logged in as an Admin user
And I have clicked the profile menu
And I have clicked Settings
When I click manage incidents
Then I am taken to a list of all incidents
	The **Admin User** can navigate to the **Manage Incidents** page and see:
	• A list of all incidents
	• **Add New Incident** button
	• Sort & Filter
	  ◦ Sort by
	  ▪ Incident name (A-Z)
	  ▪ Incident name (Z-A)
	  ▪ Reported by (A-Z)
	  ▪ Reported by (Z-A)
	  ▪ Date created (Newest-oldest) - Default
	  ▪ Date created (Oldest-newest)
	  ◦ Keyword search
	  ◦ Author
	  ◦ Incident type
	  ◦ Time
	  ◦ Stage
				Settings page (Admin)
		
		Manage incidents page

TC 3.7 - Add new incident	Expected Results	

Given I am logged in as an Admin user **And** I have clicked the profile menu **And** I have clicked Settings **And** I have clicked manage incidents **When** I click add new incident **Then** I am able to add a new incident	The **Admin User** can navigate to the **Add New Incident** page and see an incident form to fill in which includes the following: • Incident type • Date and time • Incident name • Referred by • Organisation • Telephone number • Email • Has the referrer requested support from the local resilience team? All **mandatory fields are highlighted in red.** Once all mandatory fields are completed, the **Save** button becomes enabled and the Admin user can create the new incident.	 Settings page (Admin)  Manage incidents page  Incident form - incomplete Incident form - complete

TC 3.8 - View privacy notice	**Expected Results**	

Given I click the profile menu **When** I click privacy notice **Then** I see the privacy notice page	The user can navigate to the **Privacy Notice** page.	 Profile menu  Privacy notice

Incidents

TC - 4

TC 4.1 - Incident page	Expected Results	

Given I am logged into L!SA with valid NDT credentials
When I open the navigation drawer
And click Incidents
Then I should be taken to the Incidents page
	The user can navigate to the **Incidents** page and see:
	• A list of all the Incidents
	• Sort & Filter
	  ◦ Sort by
	  ▪ Incident name (A-Z)
	  ▪ Incident name (Z-A)
	  ▪ Reported by (A-Z)
	  ▪ Reported by (Z-A)
	  ▪ Date created (Newest-oldest) - Default
	  ▪ Date created (Oldest-newest)
	  ◦ Keyword search
	  ◦ Author
	  ◦ Incident type
	  ◦ Time
	  ◦ Stage
		
		Navigation drawer
		 		Incidents page

TC 4.2 - Incident Log page	Expected Results	

Given I have clicked on Incidents
When I click on an Incident
Then I should be taken to the Incidents Log page
	The user can navigate to the **Incident Log** page and see:
	• The Incident title
	• The Incident type
	• The Incident overview
	• Add new button
	  ◦ Form
	  ◦ Task
	  ◦ Update
	• Sort & Filter
	  ◦ Sort by
	  ▪ Author (A-Z)
	  ▪ Author (Z-A)
	  ▪ Date created (Newest-oldest) - Default
	  ▪ Date created (Oldest-newest)
	  ◦ Keyword search
	  ◦ Attachment
	  ▪ File
	  ▪ Location
	  ▪ Recording
	  ▪ Sketch
	  ◦ Log type
	  ◦ Time
	• Log entries from the Incident which show:
	  ◦ Log type
	  ◦ Date and time
	  ◦ Author
	  ◦ Unique log ID
				Incidents page
		
		Incident Log page

Admin and General user will see a different overview

TC 4.3 - Incident Overview page	Expected Results	

Given I have clicked on Incidents
And I have clicked on the three dots icon
When I click on the Incident Overview
Then I should be taken to the Incidents Overview page
	The user can navigate to the **Incident Overview** page and see:
	• The Incident title
	• The Incident type
	• Summary
	  ◦ Stage
	  ◦ Incident type
	  ◦ Date and time recorded
	  ◦ Incident name
	• Referral Information
	  ◦ Referred by
	  ◦ Organisation
	  ◦ Telephone number
	  ◦ Email
	  ◦ Has the referrer requested support from the local resilience team?
	  ◦ Support details (if applicable)
	• Other Information
	  ◦ Recorded by
	  ◦ Current stage
				Incidents page
		
		Incidents log page
		 		Incident overview page (Admin)
		 		Incident overview page (General user)

Pre-conditions: You will need to be logged in as an Admin user.

TC 4.4 - Change Incident stage	**Expected Results**	

Given I am logged in as an Admin **And** I am on the Incident Overview **When** I click stage **Then** I am able to change the Incident stage **And** a log entry should be generated	The Admin user can update the **Incident stage**. The stages are: • Monitoring • Response • Recovery • Closed Once a stage is selected, the **Incident stage updates** to reflect the selected status and a log entry is generated.	 Incident overview page (Admin)  Stage change options  Stage changed  Log generated

Tasks

TC - 5

TC 5.1 - Create task from Homepage	Expected Results	

Given I am on the Homepage **And** I click add new **When** I select task **And** I choose the the Incident for the task **And** I fill out the task form **And** I click save **Then** the task should be saved successfully **And** I should see the task in Tasks **And** I should see the log generated in the Incident	The user can select **Add New → Task** from the homepage and is prompted to select the **incident**. The task form includes the following **mandatory fields**: • Task name • Assign to • Task description Once the mandatory fields are completed, the **Save** button becomes enabled. The task form also includes the following **optional fields**: • Location • Attachments • Voice recordings • Sketch Once saved: • The task appears on the **Tasks page**. • A **log entry** is generated in the **incident log** for the selected incident.	 Add new - Task  Select Incident  Add new task form  Completed form  New task

		 Log generated

TC 5.2 - Create task from Incident log	Expected Results	
Given I have clicked Incidents **And** I have selected an Incident **And** I click add new **When** I select task **And** I fill out the task form **And** I click save **Then** the task should be saved successfully **And** I should see the task in Tasks **And** I should see the log generated in the Incident	The user can navigate to an **Incident log** and select **Add New → Task**. The task form includes the following **mandatory fields**: • Task name • Assign to • Task description Once the mandatory fields are completed, the **Save** button becomes enabled. The task form also includes the following **optional fields**: • Location • Attachments • Voice recordings • Sketch Once saved: • The task appears on the **Tasks page**. • A **log entry** is generated in the **incident log** for the selected incident.	 Incident log  Add new task form  Completed form

		 New task Log generated

TC 5.3 - Create task from Tasks	Expected Results	
Given I have clicked Tasks **When** I click add task **And** I choose the the Incident for the task **And** I fill out the task form **And** I click save **Then** the task should be saved successfully **And** I should see the task in Tasks	The user can navigate to **Tasks** and select **Add Task**. The task form includes the following **mandatory fields**: • Task name • Assign to • Task description Once the mandatory fields are completed, the **Save** button becomes enabled. The task form also includes the following **optional fields**: • Location • Attachments • Voice recordings • Sketch Once saved:	 Tasks page  Select Incident

	• The task appears on the **Tasks page**. • A **log entry** is generated in the **incident log** for the selected incident.	 Add new task form  Completed form  New task

TC 5.4 - Update task status	Expected Results	
Given I am the assignee of a task **And** I am viewing that task **When** I select status **Then** I can update the status of the task **And** I should see a log generated in the Incident	If a user is assigned a task, they can update the status. The statuses are: • To do • In progress • Done Once a status is selected, the **task status updates** to reflect the selected status and a log entry is generated.	 Task  Changing status

		 Status changed Log entry generated

TC 5.5 - Reassign task	Expected Results	
Given I am the creator or assignee of a task **When** I click Assigned to **Then** I can change the assignee of the task **And** I should see a log generated	The **task creator** or the **current assignee** can change the **assignee** of a task. Once a new assignee is selected, the **task updates to display the newly assigned user** and a log entry is generated.	 Task  Change assignee

		 Assignee changed Log entry generated

TC 5.6 - View log entry from task	Expected Results	
Given I am viewing a task **When** I click view log entry **Then** I am taken to the log entry	The user can select the option to **view the log entry** associated with the task. The corresponding **log entry is displayed in the incident log and highlighted**.	 Task Log entry highlighted

Forms

TC - 6

TC 6.1 - Create form from Homepage	Expected Results	
Given I am on the Homepage **And** I click add new **When** I select form **And** I choose the the Incident for the form **And** I choose a form **And** I fill out a form **And** I click save **Then** the form should be saved successfully **And** I should see a log generated in the Incident	The user can select **Add New → Form** from the homepage and is prompted to select the **incident**. The user can choose which **form type** to complete. The available options are: • Action • Communication • Decision • Risk Assessment • Risk Assessment Review • SitRep (M/ETHANE) • Custom Form Each form contains **mandatory fields**, which are displayed in **red**, and **optional fields**, which are displayed in **grey**. Once all **mandatory fields** are completed, the **Save** button becomes enabled and the form can be saved. Once saved, the **form appears in the incident log** for the selected incident.	 Add new - Form  Select Incident  Select form  Form selection  Add new form

		 Form complete Form submitting Form submitted

TC 6.2 - Create form from Incident log	Expected Results	
Given I have clicked Incidents **And** I have selected an Incident **And** I click add new **When** I select form **And** I choose a form **And** I fill out the form **And** I click save **Then** the form should be saved successfully **And** I should see a log generated in the Incident	The user can navigate to an **Incident log** and select **Add New → Form**. The user can choose which **form type** to complete. The available options are: • Action • Communication • Decision • Risk Assessment • Risk Assessment Review • SitRep (M/ETHANE)	 Incident log

- Custom Form

Each form contains **mandatory fields**, which are displayed in **red**, and **optional fields**, which are displayed in **grey**.

Once all **mandatory fields** are completed, the **Save** button becomes enabled and the form can be saved.

Once saved, the **form appears in the incident log** for the selected incident.
